

## 1911A1 GOVERNMENT MODEL .45 ACP

ILM 1911  
MSRP 779.00

- Original "G.I." configuration
- Checkered plastic grip panels
- Precision-machined frame and slide

Built to exacting standards, the Inland 1911A1 Government Model maintains historic military style with added modern features. The original "G.I." configuration includes vertical slide serrations, fixed combat sights and a lanyard loop. The precision-machined frame and slide complement the GI Style grip panels, thumb safety, slide release, barrel bushing and grip safety. Includes one seven-round magazine.

## 1911 CUSTOM CARRY

ILM 1911TC  
MSRP 999.00

- Genuine NOVAK Sights
- Checkered grip & Mainspring Housing
- Aggressive Slide Serrations
- .45 ACP Caliber

Built to highest manufacturing standards, the modern features of the Inland 1911 Custom Carry could make this 1911 the only one you would ever carry. The features of the Inland 1911 Custom Carry are proven in the field as a concealed carry sidearm and in competition. The pistol is precision machined with a cast frame and solid billet slide. Standard features include ERGO XTR grip panels, extended thumb safety, extended full length recoil guide rod, beavertail grip safety, adjustable target trigger, skeletonized combat hammer, and 20 TPI checkering on the grip and mainspring housing.

## M37 TRENCH GUN

ILM M37  
MSRP 1299.00

No WWII firearm collection is complete without a military shotgun. One of the most highly acclaimed trench guns in US history was the Ithaca Model 37, based on the Browning Model 17. Our new M37 Trench Gun is built exclusively for Inland Mfg. by Ithaca Gun Company, and features a 20" barrel, military markings, a heatshield with bayonet lug, and is chambered for 12 gauge (3").

## INLAND PRE-70 SERIES 1911 PISTOLS

NEW FOR 2017!

New for 2017 is something old! In response to the many shooters that desire the classic 1911 70 Series-styled actions, we have taken another step backwards and are now offering a lineup of Pre-70 Series 1911s for the discriminating firearm enthusiast. All components are 100% machined in Ohio with no castings or MIM components and hand fitted for the ultimate in handgun performance.

## 1911A1 GOVERNMENT MODEL

ILM 1911-700  
MSRP 1995.00

Built to standards that far exceed the original Government issue 1911A1s, the Inland Pre-Series 70 1911A1 chambered in .45 acp features the original "Government" configuration with vertical slide serrations, fixed combat sights and a lanyard loop. Precision machined from forgings and solid billet, this 1911A1 pistol features GI Style wood grip panels, thumb safety, slide release, barrel bushing and grip safety. Additionally, this beautiful GI 1911A1 has markings from the Ithaca Gun Company, one of the "ORIGINAL" WWII 1911A1 contractors!

## 1911A1 NATIONAL MATCH

ILM 1911-702  
MSRP 2195.00

The 1911A1 National Match chambered in .45 ACP is a Pre-Series 70 action Government Model that is handfitted with a National Match barrel and bushing, and features an extended aluminum trigger with over-travel adjustment and adjustable sights. Precision machined from forgings and solid billet, this 1911A1 exceeds the standards set for National Match pistols. Reminiscent of the National Match "Hardball" guns of the late 50's & 60's, this timeless classic is ready to get you on target out of the box!

## 1911 CUSTOM CARRY

ILM 1911-701  
MSRP 1995.00

The Pre-Series 70 Custom Carry offers similar features to our Series 80 Stainless version, and is precision machined from forgings and solid billet steel. All components are hand fitted providing combat reliability and match grade performance. The Inland 1911 Custom Carry models are proven in the field as a concealed carry sidearm and in competition. Standard features include ERGO XTR grip panels, extended thumb safety, beavertail grip safety, adjustable target trigger, skeletonized combat hammer, and checkering on the grip and mainspring housing.

- Genuine NOVAK sights
- Checkered grip & mainspring housing
- Aggressive slide serrations
- .45 ACP caliber

dB Foam, when used as directed is safe to use with most firearm suppressor designs and will significantly reduce the sound level of firearm suppressors. Independent testing using a variety of commercial suppressor designs averaged a 3-5 dB reduction with 10 shot strings of fire utilizing MIL-STD-1474E sound level testing procedures. The most significant reduction when using dB Foam was found with the first shot fired with dB reduction in some cases that exceeded 10 dB.

dB Foam has been formulated to maintain the foam consistency for up to 6 months of storage. This attribute will provide the great sound reduction when utilizing the suppressor for hunting and tactical applications.

dB Foam displaces water and provides rust inhibiting protection for the internals of your suppressors and firearms. dB Foam is water soluble, simply wash your suppressor in warm water and wipe dry after use.

dB Foam lubricates as it protects. dB Foam provides a lubricating film that protects the internal components of suppressors with rust inhibiting properties. Residue that is blown back into the firearm action from the backwash of the suppressor will provide the same protection to the firearm bore and action.

Patent Pending

In 1941 with the US being pulled into one of the greatest conflicts in world history, a division of General Motors was tasked to support the war effort. The result was firearm history with Inland Manufacturing becoming one of the largest gun manufacturers in the United States, producing nearly 3 million firearms in less than 5 years. The most notable of Inland's firearm production was the .30 Caliber M1 carbine and the folding stock variant, the M1A1 Paratrooper model.

Dayton, Ohio was home for the original Inland company, and is now the home of the new Inland Manufacturing, located just two miles from the original facility and producing a new line of .30 caliber M1 carbines and variations of historic military inspired firearms.

Quality is never compromised at Inland. Every Inland gun is made in accordance with the strictest international manufacturing standards, and is individually tested at the factory firing range. High standards of manufacturing are paramount and our staff is committed to ensure your satisfaction when investing in an Inland product.

## US CARBINE .30 CALIBER T30

The new Inland T30 Sniper carbine is based on the T3 Sniper rifle that was developed by Inland in 1944. The original T3 was an M1 carbine with a modified receiver with a welded on scope mount. The scope mount utilized the Redfield style scope rings, similar to the mount utilized for the 1903A4 sniper rifle.

The new Inland T30 Sniper Carbine has been modified with an integrated mount utilizing Redfield style rings. The rifle features an 18" barrel chambered in .30 carbine, push button safety, round bolt, "low wood" walnut stock, 10 round magazine, and a clamp-on style conical flash hider.

The T30 carbine is available with a vintage style M82G2 Sniper Scope by Hi-Lux. During WWII, one of the riflescopes chosen for the M1C Garand sniper rifle, as well as the Remington Model 1903A4 Springfield pattern bolt-action .30/06 sniper rifle, was the 7/8-inch tube 2.5x Lyman Alaskan, which was designated "TELESCOPE M82". Primarily the M82 was used to turn select rifles into very effective longer range (600 to 800 yards) sniper rifles. The M82 scopes were utilized in WW II and were called upon again for use during the Korean Conflict and in Vietnam during the 1960's.

ILM 310 T-30 Rifle Only  
MSRP 1279.00

ILM 320 T-30 as shown with scope  
MSRP 1695.00

## US CARBINE .30 CALIBER M1

The new Inland M1 carbines feature many of the same characteristics of the original Inland carbines and are manufactured in the USA! The 1945 version of the M1 carbine is modeled after the last production model that Inland manufactured and features a type 3 bayonet lug / barrel band, adjustable rear sights, push button safety, round bolt, "low wood" walnut stock, and a 15 round magazine. A 30 rd mag catch was utilized to allow high capacity magazines.

ILM 130  
MSRP 1139.00

The 1944 M1 Carbine has the same features as the 1945, but with a Type 2 barrel band and 10 round magazine, it is available for sale in most states with magazine capacity and bayonet lug restrictions.

ILM 140  
MSRP 1139.00

The M1A1 is modeled after a late production 1944 M1A1 Paratrooper model with a folding "low wood" walnut stock, Type 2 barrel band, and includes the same style adjustable sights which were actually introduced in 1944. The M1A1 includes a 15 round magazine and offers the same common features of the 1945 M1 Model.

ILM 150  
MSRP 1279.00

Attention to detail has been carefully taken to produce replicas as close to the original Inland production as possible, including cartouche marks and stampings in the wood and other specific features of the Inland carbines.

## M1 CARBINE PISTOL "ADVISOR MODEL"

12" Pistol, Parkerized Finish  
Modified "Paratrooper" stock  
.30 Caliber, 15 Round Magazine  
Threaded barrel w/ Conical Flash Hider

The "Advisor" M1 pistol is modeled after the modified M1 carbine that was a popular conversion made by US Military Advisors during the Vietnam Era. These Military Advisors found that the compact and reliable M1 carbine could be made even more suitable for their specific missions by cutting the barrels down to pistol lengths and utilizing either a cut down standard stock or the M1A1 folding stock.

ILM 200  
MSRP 1259.00

## M1 "JUNGLE" CARBINE (JUNGLE RULES APPLY)

ILM 170  
MSRP 1159.00

The new Inland M1 "Jungle Carbine" is modeled after the 1944 M1 carbine featuring a "Type 2" barrel band. Since "Jungle Rules" apply, there are no rules! This handy little carbine features a 16" (1/2" x 28 tpi) threaded barrel with a conical flash hider giving it a very familiar profile of other jungle carbines. The Jungle Carbine features adjustable rear sights, push button safety, round bolt, "low wood" walnut stock, and a 15 round magazine. A 30 rd mag catch was utilized to allow high capacity magazines.

## M1 "SCOUT" CARBINE (THE NEW BLACK GUN)

ILM 160  
MSRP 1295.00

The new Inland M1 "Scout Carbine" is a modern variation of the new Jungle Carbine. This handy little carbine features a 16" (1/2" x 28 tpi) threaded barrel with a conical flash hider. The Scout Carbine features adjustable rear sights, push button safety, round bolt, "low wood" black textured stock, and a 15 round magazine. A 30 rd mag catch was utilized to allow high capacity magazines. The "Scout Carbine" is finished off with an aluminum tactical handguard with a machined picatinny rail for mounting optics or other accessories in a scout rifle configuration.

The new Inland M1 Scout shown with the optional 1-4x Scout Rifle scope with extended eye relief.

## INLAND LIBERATOR 45

- Stainless steel double barrel and frame
- Patented rebounding hammer
- Retracting ring pins
- Cross-bolt safety
- Spring-loaded, cammed locking lever

In the spirit of the FP-45 Liberator pistol developed by Inland Division of General Motors during WWII, we are proud to offer our version of the Inland Liberator 45. Inland has partnered with Bond Arms to produce the new Inland Liberator 45 derringer chambered in .45 ACP with 3" double barrels. The Liberator 45 has a bead-blasted anti-glare finish with wood grips.

ILMDER45  
MSRP 559.00

**NEW FOR 2017!**

## PM-22 Suppressor

Inland Manufacturing is proud to offer the new PM-22 Suppressor designed specifically for rimfire use.

The new PM-22 rimfire suppressor is 5.5" overall length and just under 1" diameter. Weighing in at 3.3 oz, it could be one of the lightest suppressors on the market today. The new Inland PM-22 is constructed with an aluminum tube and stainless steel base threaded 1/2 X 28 TPI. The I-Core polymer monolithic disposable baffle system features the X Baffle system that was designed to be used dry or with the new dB Foam suppressor foam for maximum efficiency.
